

Newberries Primary School – Computing Overview

Foundation Stage			
Year R	Autumn	Spring	Summer
	<p>The EYFS section of the Primary Computing Curriculum is provided to help EYFS practitioners in ensuring they are providing an adequate breadth of experiences using technology across all areas of learning, and are preparing children for the 2014 Computing Curriculum. It is designed to be used alongside the EYFS Early Years Outcomes.</p> <p>For ease of reference, the Early Years Outcomes technology statements have been summarised at the end of the EYFS section.</p> <p>To keep in with the ethos of learning through play, the EYFS section has the planning and resourcing presented as tArea Link Cards, for the following areas:</p> <ul style="list-style-type: none">· Art, Design and Technology Area - Children talk about processes when exploring their own creativity. They use recording devices and create digital images and animation.· Book and Reading Area - Children play phonics games on devices. They record sound effects for storytelling, and use CDs and other sound technologies.· Construction Area - Children take photographs and use sound recorders. They use technology to research and find out about structures, and use instructional language.· Fine Motor Area - Children develop mouse skills and fine motor skills through using controls on technology devices· Graphics Area - Children use apps and software to create graphics. They develop typing skills and print their work. They develop their computing vocabulary· Investigation Area - Children use technology to collect data and present information.· Music Area - Children make sounds and music using technology. They develop vocabulary to describe sounds .· Role Play Area - Children incorporate technology into their role-play, e.g. a cash till. They use instructional language and explore programmable devices such as floor robots.· Small World Area - Children use sound devices to record and play back appropriate sounds to enhance imaginative play. They explore digital toys and programmable devices, using instructional language and programming sequences.		

KS1

Year 1	Autumn	Spring	Summer	
	<p><u>Computing systems and networks - Technology around us</u></p> <p>To identify technology</p> <ul style="list-style-type: none"> I can explain technology as something that helps us I can locate examples of technology in the classroom I can explain how these technology examples help us <p>To identify a computer and its main parts</p> <ul style="list-style-type: none"> I can name the main parts of a computer I can switch on and log into a computer I can use a mouse to click and drag <p>To use a mouse in different ways</p> <ul style="list-style-type: none"> I can use a mouse to open a program I can click and drag to make objects on a screen I can use a mouse to create a picture <p>To use a keyboard to type</p> <ul style="list-style-type: none"> I can tell you that writing on a computer is called typing I can type my name on a computer 	<p><u>Creating Media - Digital Painting</u></p> <p>To describe what different freehand tools do</p> <ul style="list-style-type: none"> I can make marks on a screen and explain which tools I used I can draw lines on a screen and explain which tools I used I can use the paint tools to draw a picture <p>To use the shape tool and the line tools</p> <ul style="list-style-type: none"> I can make marks with the square and line tools I can use the shape and line tools effectively I can use the shape and line tools to recreate the work of an artist <p>To make careful choices when painting a digital picture</p> <ul style="list-style-type: none"> I can choose appropriate shapes I can make appropriate colour choices I can create a picture in the style of an artist <p>To explain why I chose the tools I used</p> <ul style="list-style-type: none"> I know that different paint tools do different jobs 	<p><u>Creating Media - Digital writing</u></p> <p>To use a computer to write</p> <ul style="list-style-type: none"> I can open a word processor I can recognise keys on a keyboard I can identify and find keys on a keyboard <p>To add and remove text on a computer</p> <ul style="list-style-type: none"> I can enter text into a computer I can use letter, number, and space keys I can use backspace to remove text <p>To identify that the look of text can be changed on a computer</p> <ul style="list-style-type: none"> I can type capital letters I can explain what the keys that I have learnt about already do I can identify the toolbar and use bold, italic, and underline <p>To make careful choices when changing text</p>	
		<p><u>Grouping data</u></p> <p>To label objects</p> <ul style="list-style-type: none"> I can describe objects using labels I can match objects to groups I can identify the label for a group of objects <p>To identify that objects can be counted</p> <ul style="list-style-type: none"> I can count objects I can group objects I can count a group of objects <p>To describe objects in different ways</p> <ul style="list-style-type: none"> I can describe an object I can describe a property of an object I can find objects with similar properties <p>To count objects with the same properties</p> <ul style="list-style-type: none"> I can group similar objects I can group objects in more than one way I can count how many objects 	<p><u>Programming A - Moving a robot</u></p> <p>To explain what a given command will do</p> <ul style="list-style-type: none"> I can predict the outcome of a command on a device I can match a command to an outcome I can run a command on a device <p>To act out a given word</p> <ul style="list-style-type: none"> I can follow an instruction I can recall words that can be acted out I can give directions <p>To combine forwards and backwards commands to make a sequence</p> <ul style="list-style-type: none"> I can compare forwards and backwards movements I can start a sequence from the same place I can predict the outcome of a sequence involving forwards and backwards commands <p>To combine four direction commands to make sequences</p> <ul style="list-style-type: none"> I can compare left and right turns 	
			<p><u>Programming B - Animations</u></p> <p>To choose a command for a given purpose</p> <ul style="list-style-type: none"> I can find the commands to move a sprite I can use commands to move a sprite I can compare different programming tools <p>To show that a series of commands can be joined together</p> <ul style="list-style-type: none"> I can use more than one block by joining them together I can use a Start block in a program I can run my program <p>To identify the effect of changing a value</p> <ul style="list-style-type: none"> I can find blocks that have numbers I can change the value I can say what happens when I change a value <p>To explain that each sprite has its own instructions</p>	

	<ul style="list-style-type: none"> I can save my work to a file <p>To use the keyboard to edit text</p> <ul style="list-style-type: none"> I can open my work from a file I can use the arrow keys to move the cursor I can delete letters <p>To create rules for using technology responsibly</p> <ul style="list-style-type: none"> I can identify rules to keep us safe and healthy when we are using technology in and beyond the home I can give examples of some of these rules I can discuss how we benefit from these rules 	<ul style="list-style-type: none"> I can choose appropriate paint tools and colours to recreate the work of an artist I can say which tools were helpful and why <p>To use a computer on my own to paint a picture</p> <ul style="list-style-type: none"> I can make dots of colour on the page I can change the colour and brush sizes I can use dots of colour to create a picture in the style of an artist on my own <p>To compare painting a picture on a computer and on paper</p> <ul style="list-style-type: none"> I can explain that pictures can be made in lots of different ways I can spot the differences between painting on a computer and on paper I can say whether I prefer painting using a computer or using paper 	<ul style="list-style-type: none"> I can select a word by double-clicking I can select all of the text by clicking and dragging I can change the font <p>To explain why I used the tools that I chose</p> <ul style="list-style-type: none"> I can say what tool I used to change the text I can decide if my changes have improved my writing I can use 'undo' to remove changes <p>To compare writing on a computer with writing on paper</p> <ul style="list-style-type: none"> I can write a message on a computer and on paper I can compare using a computer with using a pencil and paper I can say which method I like best 	<p>share a property</p> <p>To compare groups of objects</p> <ul style="list-style-type: none"> I can choose how to group objects I can describe groups of objects I can record how many objects are in a group <p>To answer questions about groups of objects</p> <ul style="list-style-type: none"> I can decide how to group objects to answer a question I can compare groups of objects I can record and share what I have found 	<ul style="list-style-type: none"> I can experiment with turn and move commands to move a robot I can predict the outcome of a sequence involving up to four commands <p>To plan a simple program</p> <ul style="list-style-type: none"> I can explain what my program should do I can choose the order of commands in a sequence I can debug my program <p>To find more than one solution to a problem</p> <ul style="list-style-type: none"> I can identify several possible solutions I can plan two programs I can use two different programs to get to the same place 	<ul style="list-style-type: none"> I can show that a project can include more than one sprite I can delete a sprite I can add blocks to each of my sprites <p>To design the parts of a project</p> <ul style="list-style-type: none"> I can choose appropriate artwork for my project I can decide how each sprite will move I can create an algorithm for each sprite <p>To use my algorithm to create a program</p> <ul style="list-style-type: none"> I can use sprites that match my design I can add programming blocks based on my algorithm I can test the programs I have created

Year 5	Autumn	Spring	Summer	
	<p>Sharing information To explain that computers can be connected together to form systems</p> <ul style="list-style-type: none"> I can explain that systems are built using a number of parts I can describe that a computer system features inputs, processes, and outputs I can explain that computer systems communicate with other devices <p>To recognise the role of computer systems in our lives</p> <ul style="list-style-type: none"> I can identify tasks that are managed by computer systems I can identify the human elements of a computer system I can explain the benefits of a given computer system <p>To recognise how information is transferred over the internet</p> <ul style="list-style-type: none"> I can recognise that data is transferred using agreed methods I can explain that networked digital devices have unique addresses I can explain that data is transferred over networks in packets 	<p>Video editing To recognise video as moving pictures, which can include audio</p> <ul style="list-style-type: none"> I can explain that a video can include both visual and audio media I can explain the benefits of adding audio to a video I can plan a video project using a storyboard <p>To identify digital devices that can record video</p> <ul style="list-style-type: none"> I can identify and name digital devices that can record video and sound I can choose the most suitable digital device for recording my project I can locate and identify the working features of a digital device that can record video <p>To capture video using a digital device</p> <ul style="list-style-type: none"> I can select a suitable device and software to capture my video I can demonstrate suitable methods of using a digital device to capture my video 	<p>Flat-file databases To use a form to record information</p> <ul style="list-style-type: none"> I can create multiple questions about the same field I can explain how information can be recorded I can order, sort, and group my data cards <p>To compare paper and computer-based databases</p> <ul style="list-style-type: none"> I can navigate a flat-file database to compare different views of information I can explain what a 'field' and a 'record' is in a database I can choose which field to sort data by to answer a given question <p>To outline how grouping and then sorting data allows us to answer questions</p> <ul style="list-style-type: none"> I can explain how information can be grouped I can group information to answer questions I can combine grouping and sorting to 	<p>Programming A - Selection in physical computing To control a simple circuit connected to a computer</p> <ul style="list-style-type: none"> I can build a simple circuit to connect a microcontroller to a computer I can program a microcontroller to light an LED I can explain why I used an infinite loop <p>To write a program that includes count-controlled loops</p> <ul style="list-style-type: none"> I can connect more than one output device to a microcontroller I can design sequences for given output devices I can decide which output devices I control with a count-controlled loop <p>To explain that a loop can stop when a condition is met, eg number of times</p> <ul style="list-style-type: none"> I can explain that a condition is something that can be either true or false (eg whether a value is more than 10, or whether a button has been pressed) I can experiment with a 'do until' loop
	<p>Vector drawing To identify that drawing tools can be used to produce different outcomes</p> <ul style="list-style-type: none"> I can recognise that vector drawings are made using shapes I can identify the main drawing tools I can discuss how a vector drawing is different from paper-based drawings <p>To create a vector drawing by combining shapes</p> <ul style="list-style-type: none"> I can identify the shapes used to make a vector drawing I can explain that each element added to a vector drawing is an object I can move, resize, and rotate objects I have duplicated <p>To use tools to achieve a desired effect</p> <ul style="list-style-type: none"> I can use the zoom tool to help me add detail to my drawings I can explain how alignment grids and resize handles can be used to improve 		<p>Programming B - Selection in quizzes To explain how selection is used in computer programs</p> <ul style="list-style-type: none"> I can recall how conditions are used in selection I can identify conditions in a program I can modify a condition in a program <p>To relate that a conditional statement connects a condition to an outcome</p> <ul style="list-style-type: none"> I can use selection in an infinite loop to check a condition I can identify the condition and outcomes in an 'if... then... else...' statement I can create a program with different outcomes using selection <p>To explain how selection directs the flow of a program</p> <ul style="list-style-type: none"> I can explain that program flow can branch according to a condition I can design the flow of a program which 	

	<p>To explain how sharing information online lets people in different places work together</p> <ul style="list-style-type: none"> I can recognise that connected digital devices can allow us to access shared files stored online I can send information over the internet in different ways I can explain that the internet allows different media to be shared <p>To contribute to a shared project online</p> <ul style="list-style-type: none"> I can suggest strategies to ensure successful group work I can make thoughtful suggestions on my group's work I can compare working online with working offline <p>To evaluate different ways of working together online</p> <ul style="list-style-type: none"> I can identify different ways of working together online I can recognise that working together on the internet can be public or private I can explain how the internet enables effective collaboration 	<p>consistency</p> <ul style="list-style-type: none"> I can modify objects to create different effects <p>To recognise that vector drawings consist of layers</p> <ul style="list-style-type: none"> I can identify that each added object creates a new layer in the drawing I can identify which objects are in the front layer or in the back layer of a drawing I can change the order of layers in a vector drawing <p>To group objects to make them easier to work with</p> <ul style="list-style-type: none"> I can copy part of a drawing by duplicating several objects I can group to create a single object I can reuse a group of objects to further develop my vector drawing <p>To evaluate my vector drawing</p> <ul style="list-style-type: none"> I create alternatives to vector drawings I can suggest improvements to a vector drawing I can apply what I have learned about vector drawings 	<ul style="list-style-type: none"> I can demonstrate the safe use and handling of devices <p>To recognise the features of an effective video</p> <ul style="list-style-type: none"> I can list some of the features of an effective video I can record a video that demonstrates some of the features of an effective video I can explain why lighting and angle are important in creating an effective video <p>To identify that video can be improved through reshooting and editing</p> <ul style="list-style-type: none"> I can store, retrieve, and export my recording to a computer I can explain how to improve a video by reshooting and editing I can select the correct tools to make edits to my video <p>To consider the impact of the choices made when making and sharing a video</p> <ul style="list-style-type: none"> I can make edits to my video and improve the final outcome I can recognise that my choices when making a video will impact on the quality of the final outcome I can evaluate my video and share my opinions 	<p>answer more specific questions</p> <p>To explain that tools can be used to select specific data</p> <ul style="list-style-type: none"> I can choose which field and value are required to answer a given question I can outline how 'AND' and 'OR' can be used to refine data selection I can choose multiple criteria to answer a given question <p>To explain that computer programs can be used to compare data visually</p> <ul style="list-style-type: none"> I can select an appropriate chart to visually compare data I can refine a chart by selecting a particular filter I can explain the benefits of using a computer to create graphs <p>To apply my knowledge of a database to ask and answer real-world questions</p> <ul style="list-style-type: none"> I can ask questions that will need more than one field to answer I can refine a search in a real-world context I can present my findings to a group 	<ul style="list-style-type: none"> I can program a microcontroller to respond to an input <p>To conclude that a loop can be used to repeatedly check whether a condition has been met</p> <ul style="list-style-type: none"> I can explain that a condition being met can start an action I can identify a condition and an action in my project I can use selection (an 'if... then...' statement) to direct the flow of a program <p>To design a physical project that includes selection</p> <ul style="list-style-type: none"> I can identify a condition to start an action (real world) I can describe what my project will do (the task) I can create a detailed drawing of my project <p>To create a controllable system that includes selection</p> <ul style="list-style-type: none"> I can write an algorithm to control lights and a motor I can use selection to produce an intended outcome I can test and debug my project 	<p>contains 'if... then... else...'</p> <ul style="list-style-type: none"> I can show that a condition can direct program flow in one of two ways <p>To design a program which uses selection</p> <ul style="list-style-type: none"> I can outline a given task I can use a design format to outline my project I can identify the outcome of user input in an algorithm <p>To create a program which uses selection</p> <ul style="list-style-type: none"> I can implement my algorithm to create the first section of my program I can test my program I can share my program with others <p>To evaluate my program</p> <ul style="list-style-type: none"> I can identify ways the program could be improved I can identify the setup code I need in my program I can extend my program further
