## Headline News - Ms Peters & Mrs Traxon

We hope that the second week has gone well for you and that you have found the latest resources upload useful. We are still working to make sure that they are organised and well labelled for you, to make things as easy as possible for you to use these at home. Hopefully all parents have received the email containing the password for the School Closures area of the school website. This is intended to keep access restricted just to those families associated with the school.

Staff are working hard on the packs for after Easter. These will be uploaded at the end of the Easter holidays. From now on, work will be uploaded on a weekly basis to make it easier for parents to pace this over time. Please remember that at the moment all work being set is a reinforcement of previous learning. Although we are all keen to keep the children in some sort of new routine, please do not worry if some days you do not complete as much as you would have hoped. The well-being of families is paramount in these unprecedented times.

After the holidays, we are hoping to use Purple Mash to set the children some work. This will be detailed in the upload packs. Paper based activities will continue to be set to ensure there is variety and to help if you have more than one child (or adult) trying to access computers and the internet.

We will also be launching a new email account where you can share with us photographs of some of your children's home learning achievements; ask any essential home learning questions or find out more about missing or newly requested login details.

We wish you all a good Easter break. We hope you manage to enjoy some quality time with your loved ones albeit in the confines of your homes. Stay safe and keep well!
